

This is how you give me SoluCortef

Mix the contents by pushing down the yellow top of the bottle and shake until the liquid is clear. Attach the needle onto the syringe. Remove the yellow top from the bottle and push the needle through the rubber top of the bottle. Turn the bottle upside down and extract all the liquid into the syringe. Hold up the syringe and squeeze out the air, then push the needle deep down into the thigh muscle and inject all the liquid. Don't hesitate, it can be matter of life and death. Call an ambulance!

**I have Addison's disease.
If I don't get an injection of
SoluCortef quickly I can die.
You can help me.**
