

Key Features

Adult (MA401) Size: 13 x 19 cm
 Designs are for demonstration purposes

- Reusable consumer or industrial face masks
- Made in Europe. CE certificate available on line.
- Testing: Laboratory tested fabric.
- Fabric: 4-ply cotton-blend
- Comfort: All edges have piping – no rough edges
- Strap: Polyester tie-back cord allows for a perfectly adjusted fit
- Size: Adult (Florence) 13 x 19 cm
 Kids (Frankfurt) 12 x 18 cm
- Color: Can be printed solid color or a printed design or logo
- Masks can be washed at 60°C (hand or machine laundered)
- Producer: Made in Poland by a professional workwear company with over 20 years-experience.

Note: This product is not classified as a medical device

Reusable consumer face masks made from a 4-ply filtering fabric with polyester tie-back cord. The inner layer is OEKO-TEX certified 100% cotton soft fabric on the skin. The middle layer is a non-woven filter layer (PN-EN 689) which filters dust and other particulate matter, with a filtration capacity of 96% at 6h exposure. Third layer is a durable non-woven polypropylene for increased filtration of small particles and added protection. The outer layer 100% polyester is perfect for sublimation. The mask is made from two fabric panels, which creates a conical shape with a seam down the middle.

Ideal for many environments including: front line, retail, schools, office and factory workers. These are **not medical devices** and are not intended for patients nor for healthcare professionals in medical settings. The mask does not protect against infective agents but offers preventative hygiene.
